ASSET4 ASSETMASTERPROFESSIONAL NEGATIVE SCREENING TOOL

The ASSET4 Negative Screening Tool provides a simple-to-use tool to evaluate the level of involvement of over 3,800 global companies in areas such as armaments, nuclear power, tobacco, genetically modified organisms, stem cell research and animal testing.

Within the tool, every company based on its level of exposure to each of the covered criteria receives one of four scores:

(0) = no involvement
(-1) = revenue of less than 5%
(-2) = involvement, but unknown level of revenue
(-3) = revenue of more than 5%

By default each of the criteria is included in the Overall Score for each company. However, you can customise what criteria to include in the Overall Score by simply turning on or off individual issues with the use of Yes/No pulldown menus above the columns. Once you have selected the specific issues you are interested in, you can recalculate the Overall Scores.

NEGATIVE SCREENING CRITERIA

- Armament
- Nuclear power
- Gambling
- Tobacco
- Alcohol
- GMOs
- Pornography
- Animal testing
- Agrochemicals
- Stem Cell Research
- Contraceptives
- Cluster Bombs

TRANSPARENCY

A hyperlink to the original source of the information specifying a company's level of involvement within any of the defined areas is included.
