

THOMSON REUTERS EQUAL WEIGHT CONTINUOUS COMMODITY INDEX (CCI)

THE CONTINUOUS COMMODITY INDEX

The Thomson Reuters Equal Weight Continuous Commodity Index is recognized as an unbiased, major barometer of commodity prices.

The index is comprised of 17 commodity futures that are continuously rebalanced:

Cocoa, Coffee 'C', Copper, Corn, Cotton, Crude Oil, Gold, Heating Oil, Live Cattle, Live Hogs, Natural Gas, Orange Juice, Platinum, Silver, Soybeans, Sugar No. 11 and Wheat.

The index trades on the ICE Futures Exchange.

HISTORY

The CCI stems from the original CRB Index, created in 1957. It is a 'snapshot' of the index at its 9th revision, before it underwent weighting and rebalance changes in the 10th revision. It is sometimes referred to as the 'Old CRB'.

EQUAL WEIGHTING

The 17 components of the Thomson Reuters Equal Weight CCI are weighted equally at 5.88% per component:

SECTOR ALLOCATION FOR THE CCI

	CCI	GSCI	DJ/UBS CI
ENERGY	18%	71%	33%
METALS	24%	11%	37%
SOFTS	29%	5%	10%
AGRICULTURE	29%	13%	20%

While other commodity indices tend to have overweighting in energies, the CCI provides more meaningful exposure to ALL FOUR commodity subgroups.

AVAILABILITY

The Thomson Reuters Equal Weight Continuous Commodity Index is published Real Time and is widely disseminated to subscribers including traders, analysts, consultants and media outlets.

RIC CODES:

CCI EXCESS RETURN INDEX	.TRCCI
CCI TOTAL RETURN INDEX	.CCITR
