

THOMSON REUTERS CUSTOM INDICES

Benefit from years of experience in independent index services and work with Thomson Reuters Indices to create an index to reflect a particular investment mandate or strategy.

Clients can either slice and dice existing proprietary equity benchmarks or create new indices from scratch using a variety of Thomson Reuters datasets.

40 YEARS OF EXPERIENCE

Thomson Reuters calculates Real Time and End of Day indices underlying a range of financial products in the Equity, Commodity and Fixed Income Markets.

Thomson Reuters has considerable index infrastructure which calculates indices linked to over \$200 Billion in Exchange Traded Fund AUM alone.

END-TO-END INDEX SERVICES

All sourcing, calculation, maintenance and distribution is done in-house by Thomson Reuters Indices.

Clients deal with only one provider for all indexing needs, lowering costs and complexity.

CUSTOM INDEX SOURCE DATA

Thomson Reuters has a vast range of global data across multiple asset classes which can be used for custom indices:

- Starting broad market equity index base of 10,000 stocks across 51 countries, leveraging index licenses with over 70 exchanges globally
- Over 70,000 equities across 130 countries tagged to Thomson Reuters Business Classification (TRBC) available for index creation
- Proprietary Fixed Income, Commodity, Economic data and Currency pricing available in-house
- Highly valued added, unique datasets available for filters such as I/B/E/S estimates, Starmine estimates, ASSET4 ESG or Reuters News Sentiments

GLOBAL SUPPORT, OPERATIONS AND PRESENCE

Thomson Reuters has the scale and global footprint to fully support clients in the creation and delivery of custom indices:

- 24 hour, global index development, operations and customer support
- In-house research team works with clients to validate proposed methodologies
- Regional product development support available in Americas, EMEA and Asia Pacific
- Distribution via industry standard Real Time streaming feeds, over 600,000 desktop clients and FTP/API included in service
- Highly regarded global brand with reputation for integrity and freedom from bias (ranked 30th globally by Interbrand)
- Large sales and marketing teams in all regions able to reach the investment community
