

THOMSON REUTERS INDICES

THEMATIC INDEX HIGHLIGHTS

Thomson Reuters Sector Indices are built using our proprietary sector schema, Thomson Reuters Business Classification (TRBC). TRBC consists of 4 hierarchical levels, sector indices are built for all 4 levels across our range of 51 countries and 26 regions. Thomson Reuters Sector indices allow for the analysis of a variety of investment themes, and the below benchmarks can be customized into investable indices upon request.

Note that only Global Indices are mentioned below. For other country and region variants, and a complete list of Thomson Reuters Proprietary Indices as well as TRBC industry descriptions, please view the Index Resource Library of our website.

FOOD AND AGRICULTURE

	RIC Code	Datastream Mnemonic
TR GLOBAL AGRICULTURAL CHEMICALS INDEX	.TRXFLDGLPUCHMA	X4GLCA\$
