

PROFIT FROM ACCESS TO GLOBAL FX LIQUIDITY DIRECT FROM MULTIPLE MAJOR BANKS

REUTERS TRADING FOR FOREIGN EXCHANGE (RTFX) WELCOME TO THE VIRTUAL FX MARKET PLACE

Move seamlessly and speedily from price discovery to execution across a broad spectrum of global market makers. Thomson Reuters RTFX gives you real-time price updates, one-click trading and access to a deep and wide liquidity pool – making it the portal of choice of the world's most influential FX participants.

WHY DOES THE INTERBANK MARKET TRADE ON RTFX?

With more than 650 financial institutions on RTFX across the globe, the interbank trading community gravitates naturally to this virtual market place. Here trading interest is distributed as executable one-click price streams or tailored in RFQ format for a more bilateral trading experience. Having top FX players on a secure and neutral platform ensures highly competitive prices, a safe trading environment and a thriving global community.

HOW CAN I GET IT?

RTFX is available through Thomson Reuters Eikon and Thomson Reuters Dealing – with no subscription charges or transaction fees. The functionality and access to liquidity is included as part of the Thomson Reuters Desktop offering.

HOW CAN IT BENEFIT ME?

Be with the best. Join one of the world's most rapidly expanding trading communities

Stay neutral. Our independence means you can build relationships with leading global and regional FX banks offering prices for a wide range of currency pairs

Move fast. Trade fast. One-click Fast Trades gives you instant competitive prices and deep liquidity from over 30 price makers

Efficient order execution. Place orders for competitive execution

Trade at Best. To guarantee you trade at the best price in your liquidity pool, RTFX conveniently aggregates the prices and displays the best bid and best offer for you to simply click and deal

Be confident. Trade at the center of the interbank market. Know you're transacting on highly competitive prices

Be choosy. Access the most influential market makers – with a single login

Keep in close contact. Request for Quote (RFQ) lets you contact your favorite maker on a deal ticket

Don't miss a thing. Save valuable screen space. Get multi-bank executable prices – all on one screen

Simplicity. Access deep liquidity using the most straightforward of tools

Maximize revenue potential. To leverage the breadth of liquidity from the market makers, RTFX trading features have been developed with the professional trader in mind

Feel secure in a trader-friendly environment. Select prices on offer. Click to trade and execute with your chosen liquidity provider, automatically

10 REASONS WHY THE INTERBANK MARKET TRADE ON RTFX

1. Do it your way. Because the functionality has been built with the professional trader in mind, RTFX matches the way you work. You don't have to adapt
2. Place orders. Get price improvement. Auto Trade helps you manage your workflow. It allows you to profit from machine speed price execution and price improvements
3. Get better price execution. Access algorithmic execution services of major providers
4. Be flexible. Use the default blotter templates or customize your own blotter using the highly configurable settings
5. Be adaptable. It's easy to float Market Grid panes to the size you wish on the screen
6. View-only user logins. See trade blotters of all your traders
7. Limit access. RTFX can be limited to the office, or set to 'roam'
8. Size matters. Maximum credit limits can be imposed – traders can simply switch banks off when they approach their limit
9. Keep control. Use the RTFX reporting tool to audit user login times and trading activity
10. Get STP efficiency. One convenient connection books deals with all of your market makers via Thomson Reuters Trade Notification
