

POISINDEX® SYSTEM

The Micromedex® **POISINDEX System** from the Healthcare business of Thomson Reuters is a trusted, evidence-based resource to help identify, manage, and treat toxicological exposures.

Accidental poisonings occur with even the most common and seemingly harmless substances. Having instant access to critical information can save lives. Relied upon in 100 percent of U.S. poison control centers, the POISINDEX System identifies ingredients for hundreds of thousands of commercial, biological, and pharmaceutical products. The system links that information directly to management documents providing data on clinical effects, range of toxicity, and treatment protocols for exposure. POISINDEX also delivers concise, essential toxicology data on a single screen to ensure the fastest access to critical answers.

Search for detailed toxicology data from our comprehensive database.

Drill down to specific information, including clinical effects, treatment, abstracts, and more.

FEATURES

- Access to clinical effects and range-of-toxicity data.
- At-a-glance product and substance identification.
- Current treatment protocols for exposures.
- Searchable by thousands of slang drug terms.

BENEFITS

- Saves valuable time by presenting information on a single screen.
- Frequent updates ensure access to only the most current toxicology data.
- Reduces errors and enhances patient care.
