

# MONITOR SUITE

## HOW INTELLIGENT INFORMATION CAN OPEN DOORS TO NEW BUSINESS.

MONITOR SUITE enables you to reveal actionable opportunities in high-value practice areas such as litigation, IP, and Deal. See who is doing what legal work with whom, and learn where legal needs are unmet – or could be better met by you. Turn prospects into clients – and clients into bigger clients – by growing the business, optimizing resources, and differentiating yourself with Monitor Suite.

### EASIER SEARCHING, MORE ACCURATE RESULTS.

New functionality improves usability and workflow through a single access point. Choose one of two search options:

- **Quick search** to identify legal representation needs in seconds
- **Advanced search** from an expanded list of categories, in which you refine your search criteria prior to generating a detailed analytics display to target qualified opportunities

Quickly identify prospects and filter your search results. Company results include address, website, industry category listing, and subsidiary name listings. Analyze specific subsidiaries, firm location, and subcategories for the company in question. Drill down to areas of interest for information that makes a difference.

### ANALYTICAL DISPLAY WITH NEW GRAPHICS.

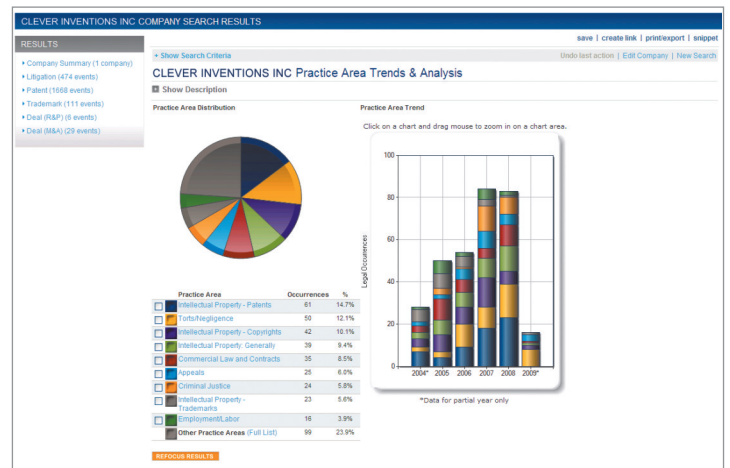

Whether viewing the activity of top clients or benchmarking the activity of specific industry peers, you can create a single display that captures all legal events.

- **Intuitive navigation:** click through practice trends and analysis displays to reveal what opportunity is available for a company of interest to you
- **Charts and graphs:** get a clear picture of your competitive landscape, identifying opportunity before others can
- **Detailed views:** analyze legal events where specific information – such as industry or law firm size – is not included in the docket

### SHARING INFORMATION YOUR WAY.

Customize a report for a client presentation or save your report (or your searches) as needed.

- **Save** specific areas of interest for you or your clients, and new business prospects; save the report online to return to the search at a later time
- **Share a report** within an organization with the ability to *Create a Link* to the report
- **Print or Export** entire reports or specific sections to professional-looking formats

Intuitive, clickable graphics reveal legal activity in high-value practice areas such as litigation, IP, and Deal. Data is powered by Thomson Reuters and West – the industry standard.

### COST-EFFICIENT AND EFFECTIVE.

Monitor Suite provides quick results allowing you to:

- **Grow** your business
- **Optimize** use of limited resources for client development
- **Differentiate** yourself against competitors with customizable reports
- **Rely** on Thomson Reuters and West analytical data
