

PIPELINE DATA INTEGRATOR

SEAMLESSLY SEARCH ACROSS THOMSON REUTERS AND THIRD PARTY DATA

WHAT YOU CAN SEARCH

- Thomson Reuters: *Thomson Pharma*[®], *Thomson Pharma*[®] *Partnering*, *Prous Science Integrity*[®]
- IMS LifeCycle: *R&D Focus*
- Adis: *Adis R&D Insight*[®]

WHAT YOU CAN DO

- Undertake powerful, cross-data searches
- View and export the results as a consolidated output
- Analyze the data in a graphical format
- Link directly to the full record source data
- Export in a variety of formats and report styles
- Stay informed of major updates made to drug reports via alerts

A UNIQUE PIPELINE DATABASE SYSTEM WHICH MAPS DRUG NAMES AND INDEX TERMS

Pipeline Data Integrator is suitable for customers who subscribe to Thomson Reuters R&D pipeline intelligence data (*Thomson Pharma*, *Thomson Pharma Partnering*, *Prous Science Integrity*) alongside *R&D Focus* from IMS LifeCycle and *Adis R&D Insight* from Adis.

It enables you to run one search over these databases, consolidating the unique data from each into a single report. You can save your reports, share them with your colleagues, and export them in a variety of preset and custom formats including Microsoft[®] Word, Microsoft Excel, BizInt, XML and SDF – matching *Pipeline Data Integrator* exactly to the needs of your project.

EXPERT DRUG NAME AND INDEX MAPPING

Using a proprietary technique created by our industry experts, the mapping process of *Pipeline Data Integrator* means you can perform a single, comprehensive search that covers all available sources – maximizing your searching power and dramatically improving efficiency.

DRUG NAME MAPPING

Thomson Reuters has developed a unique process of mapping the drug names and synonyms from all the pipeline databases, including records that are still classed as research projects or in early stage development.

	Thomson Pharma	R & D Insight	R & D Focus	Integrity
• Action	659	353	402	557
• Central Nervous System	8935	2639	2079	1865
• Cardiovascular	1236	328	300	681
• Gastrointestinal System	1739	1239	1269	891
• Respiratory System	2636	2187	1999	1289
• Pain	18	18	3	17
• Ophthalmology	4926	2022	2022	1283

• Ophthalmology - Systemic and Ocular - Systemic	2420	1020	1400	1040
• Ophthalmology - Systemic and Ocular - Ocular	1024	329	326	811
• Ophthalmology - Systemic and Ocular - Systemic and Ocular	2420	1020	1400	1040

Search using the Terms Browser

INDEX TERM MAPPING

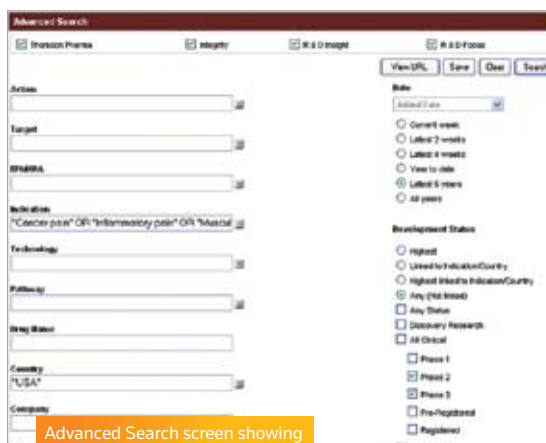

Pipeline Data Integrator maps together the equivalent terms from the different databases, ensuring that all relevant information is captured when performing a search.

MULTIPLE SEARCH OPTIONS

There are a number of search types you can run:

- **Quick search:** Run on drug names, or any text, anywhere in the drug record
- **Guided search:** Quick and simple fielded Boolean searching
- **Advanced search:** Combine different types of indexing terms, including chemical structure and substructure searching, creating comprehensive searches for precise retrieval
- **Terms Browser:** Browse databases by Action, Technology, Indication, EphMRA, Pathways and Targets, and uncover all associated terms from different databases by virtue of the mapping that has previously been performed

You can narrow your search to specific data sources, filter your original search results for a more focused result, and save your searches.

Advanced Search screen showing mapped indexing terms.

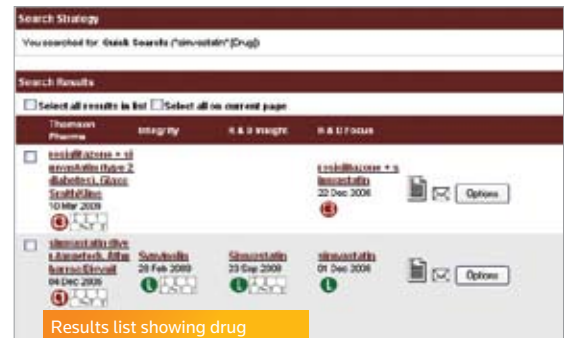

AUTOMATIC UPDATES, CHANGE REPORTING AND ALERTS

To ensure that your teams are always working with the latest available data, *Pipeline Data Integrator* is automatically updated, daily for *Thomson Pharma*, *Thomson Pharma Partnering*, and *Adis* data and weekly for *Prous Science Integrity* and *IMS* data.

You can run reports and alerts that show only the major updates to a drug report such as a new indication; phase changes or new company name. You can also set up daily, weekly or monthly email alerts on your integrated searches.

You can set your own preferences, including how many results you view at a time and the type of email updates you receive. The 'watch list' facility enables you to view reports of specific interest and receive alerts when something has been updated.

You can create your own customized exports, selecting what you want to export on a field-by-field basis and how you want it to be displayed. You can then save this as a template that you can reuse as necessary.
