ISI Web of KnowledgeSM

Take the next step 

EndNote[®]

EndNote Web

ProCite[®]

Reference Manager[®]

Researchers, scholarly writers, students, and librarians worldwide use *ISI Web of Knowledge* to search and analyze the research literature — and use premier bibliographic management resources to find, organize and format their references in thousands of publishing styles.

Bibliographic management products from Thomson Scientific offer desktop and Web productivity solutions that advance the research, writing and publishing process. Users can search the Internet, organize references and images, and create bibliographies instantly, complete with in-text citations.

Records from all *ISI Web of Knowledge* resources such as *Web of Science[®]* and *Current Contents Connect[®]* can be exported easily into these tools to create instant bibliographies. As part of the *ISI Web of Knowledge* research platform, bibliographic management resources ease and automate a once-cumbersome process:

"Users need only to key an article into the database once, and then they never need to type that reference again, no matter how many papers they write that cite that article. This approach minimizes typographical errors, and helps standardize indexing keywords and reference formats."

— Deborah Fitzgerald and Greg Eriane, *The Scientist*, Jan. 7, 2002

The EndNote family of products

EndNote is the most popular way for researchers to search online bibliographic databases, organize references, and create bibliographies instantly. *EndNote* and *EndNote Web* support primary research, faculty, staff and students with integrated writing solutions that enable users to:

- Import references from hundreds of bibliographic databases
- Search *ISI Web of Knowledge*, PubMed[®] and hundreds of library catalogs
- Organize thousands of references
- Choose from over 2,300 publishing styles
- Create cited manuscripts and instant bibliographies with Microsoft[®] Word
- Link saved references back to *ISI Web of Knowledge* and other online resources

AVAILABLE 2006

EndNote Web — the Web-based organizer and writing solution

This full-featured option will deliver a wide range of organizing, importing and formatting capabilities via the Web, plus enhanced capabilities using desktop plug-ins to browsers and word processors.

EndNote Web will help users easily build their personal reference collections by searching *ISI Web of Knowledge*, PubMed and hundreds of online library catalogs. Dynamic links to Times Cited and *Related Records*® will give *ISI Web of Knowledge* users one-click access to the latest information on a reference article. And the popular *Cite While You Write*™ will help Microsoft® Word users create bibliographies instantly.

An institutional subscription to *EndNote Web* allows scholars to manage their references away from their desktop computer, storing up to 10,000 records per account and editing references easily. They can access their reference collection at any time — on campus, at home, or while traveling. *EndNote Web* allows users to transfer references to *EndNote* for further management and to format their papers in over 2,300 publishing styles.

DESKTOP CLASSIC

EndNote — easy-to-use desktop edition

Millions of researchers, scholarly writers, students and librarians depend on this full-featured desktop edition to make creating bibliographies easy and efficient. Users can create multiple libraries of unlimited size and manage images and PDF files along with references. *EndNote* can be used out of the box or customized easily.

Additional Thomson Scientific productivity solutions:

- **ProCite** offers flexible search and management options that make this the right solution for managing detailed projects and special collections.
- **Reference Manager** is the powerful bibliographic solution for workgroups, networks and collaborative projects.
