

AI readiness checklist

Are you ready for an AI-powered future?

Many professionals envision a future where AI can help make their work more productive and fulfilling. Here are some ways to make sure you're ready.

To embrace the change:

- Identify repetitive tasks that could be automated
- Discuss perceptions and concerns with your peers
- Become better informed of responsible AI use
- Advocate for AI adoption within your organization

"Be an agent for change and encourage my team to **embrace new technologies rather than fear them** because they have concerns about job security."

To conduct thorough due diligence of AI tools:

- Research AI-powered tools **based on your industry**
- Create a list of what you need in a GenAI platform
- Discuss tools and use cases with your peers

"The firm should be **proactive in implementing AI** and other technologies into daily activities, and not take a wait-and-see approach. Those who fall behind will not be able to catch up."

To stay educated and up to date:

- Attend AI-related webinars and courses
- Join professional AI groups
- Read industry reports or professional newsletters
- Explore demos of specific solutions

"The most important action... is building a culture of **continuous learning focusing on AI literacy**. This empowers our team to understand and leverage AI responsibly..."
